-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_\_ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on February 23, 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Response to Amendment***

After a review of applicant's remarks, all necessary changes to the claims have been entered. Accordingly, new claims 9, 10, and 11 have been added.

Applicant's arguments filed February 23, 2006 have been fully considered but they are not persuasive. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art reference.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seeley et al. (US 6,484,049) in view of Vilsmeier (US 2003/0185346).

The Seeley et al. patent teaches all the limitations of the claimed subject matter except for mentioning specifically the steps of calibrating an x-ray device in a medical navigation system to obtain registering information enabling an x-ray image acquired by the x-ray device in anyone of a plurality of different positions to be registered in the navigation system, and using the calibrated x-ray device to produce a plurality of x-ray images of the patient from different positions, as recited in claims 1, 7 and 8.

However, the steps of calibrating an x-ray device in a medical navigation system to obtain registering information enabling an x-ray image acquired by the x-ray device in anyone of a plurality of different positions to be registered in the navigation system, and using the calibrated x-ray device to produce a plurality of x-ray images of the patient from different positions.

The Vilsmeier patent teaches the steps of calibrating an x-ray device in a medical navigation system to obtain registering information enabling an x-ray image acquired by the x-ray device in anyone of a plurality of different positions to be registered in the navigation system, and using the calibrated x-ray device to produce a plurality of x-ray images of the patient from different positions (see abstract and paragraphs 0026, 0028, 0031).

Based on the above observations, for a person of ordinary skill in the art, modifying the method disclosed by Seeley et al., with the above discussed enhancements would have been considered obvious because such modifications would have significantly reduced the radiation load and minimizes the costs of imaging.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
